

Wisconsin FAASTeam presents:

Go or No Go IFR Scenario - Green Bay IMC Club Monthly Meeting

A good activity for anyone interested in instrument flying. Use real world scenarios to increase your level of safety in the IFR environment. Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. The Green Bay IMC Club provides organized "hangar flying" focused on building proficiency in instrument flying. An instrument rating is not required for attendance. This meeting scenario addresses the vital question that must be answered before every flight - Go or No Go? The interactive discussion will prove helpful when making future go/no go decisions. The meeting will also include another episode of our continuing video weather series, addressing the timely topic of turbulence.

Directions: Upper Level Meeting Area

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
